## KVARKEN ARCHIPELAGO ATTRACTIONS

On the Finnish side of the Gulf of Bothnia, just outside the city of Vaasa, there is a large archipelago, also known as the Kvarken Archipelago. The area includes the big islands Replot and Björköby with a large number of smaller islands belonging to the municipality of Korsholm. Currently, there are about 2500 inhabitants on these islands.

### GEOGRAPHIC LOCATION

Kvarken is, in fact, the narrowest part of the Gulf of Bothnia, where the distance between Finnish and Swedish mainland is only about 80 km. From the outer Archipelago, Klobbskat, it is only 50 km to the Swedish city of Umeå, and that makes it possible to go by smaller boat on a beautiful summer day.

### UNESCO WORLD HERITAGE

During the last ice age, the Kvarken region was covered by an about 3,5 km thick ice layer. The glaciers were so heavy that they forced the Earth's crust to sink. When the ice melted some 9,000 years ago, the crust began to rise again. Now, about one square km rises from the waters yearly, meaning that we get new land equivalent

to about 150 soccer fields, every year. This is one of the reasons why part of the area is listed as a UNESCO world heritage.

### SERVICES IN KVARKEN ARCHIPELAGO

Here, in these beautiful surroundings, you can find four tourism entrepreneurs, ready to give you an unforgettable experience. On the following pages, we want to present some suggestions of what you can do in our region. This is only a few examples, but we hope that you will get inspired! No matter if you are seeking for peace and quiet where only the sound of the ever-rolling sea is your companion, or if you want to have more adventures on your stay here, we will fulfill your dreams. Welcome!
