### PLACES OF INTEREST

The wooden church in Kittilä has been designed by Carl Ludwig Engel and it was built between 1829-31. The baroque-style pulpit dates back to 1687. Local history can be viewed at the museum of local history and culture in the Pakatti district, which is open in summertime. Swimming is popular in the summer. Right in the town centre, the Einari Junttila Art Museum and the home of Kalervo Palsa, a local artist are worth a visit. The Karinnokka birdwatching tower and, next to it on the bank of the Ounasjoki river, the Karinnokka shelter, where people can picnic or rest attract bird-watchers & trekkers.

### EVENTS

There are lots of events in Kittilä running throughout the year. One of the main events is the traditional summer market in Kittilä centre, organized two weeks after Midsummer. It has been held since the 1600's. Traditionally the market was a place to sell food, tools, make trades, dance and meet people. The market has shaped into modern summer event, but in Kittilä a certain traditional spirit has been preserved.

### MORE ABOUT KITTILÄ REGION

The village of Kittilä offers naturally beautiful surrounding to visit, many different kinds of recreational activities and an outdoors lifestyle. There are lots of ways to spend your free time – outdoor activities, excursions, tours, cultural offerings and sights – and many different kinds of accommodation. The main village Kittilä and its surrounding smaller villages give you the peace and quiet of the countryside combined with a close-knit village community, together with several annual events organized with the help of active residents. The villages offer a peaceful and safe environment to visit, near the developing international centre that is the activity resort of Levi.

There are not four, but eight seasons of the year in Kittilä, each with its own mood, colours and scenery: ranging from the dark of the polar night to the glorious midnight sun, and

from the peak of a buzzing, flowery spring to the dazzling hues of autumn. Visitors and local residents alike are captivated by the magnificent highland fells and the grand Ounasjoki river that runs through the region and shapes its scenery. The municipality of Kittilä spans over a huge area: between its northernmost and southernmost villages lie more than 140 kilometres of sweeping vistas and breathtaking scenery.

The municipality of Kittilä includes Levi, one of the most popular year-round ski and activity resorts in Finland, and features Europe's biggest gold mine. Many destinations can be reached from its international airport through its flight connections year round. In the tourist season, there are flights arriving daily from Finland and the rest of Europe. Internationality plays a significant role in the economic life of the Kittilä municipality, which lies above the Arctic Circle. There is also a high density of businesses here: roughly 600 enterprises in the municipality give it one of the highest commercial densities in Finland. The development of tourism and mining in Kittilä has created a modern and international atmosphere in the municipality, yet the traditional way of life still exists in many of the region's villages, also remaining present in their culture, art and events. There are many artists' homes and other interesting sights to see in the area.

## NORTHERN LIGHTS SEASON PROGRAMME

### NORTHERN LIGHTS SEASON ACTIVITY PROGRAMME

What do the Northern Lights sound like? What does the rich spectrum of autumn colours look like on fells and in the forests in the North? When winter nears, nature dresses in its most vibrant colours. Autumn colours paint the fells. As far as the eye can see, the forests turn beautiful shades of orange and red. It is time to slow down, meditate, walk in a forest and breathe the fresh autumn air.

### TAKE A PHOTO OF YOUR EXPERIENCE

The autumn colours in Lapland are breathtakingly beautiful. Make memories of a lifetime and take pictures of the playful colours, the falling leaves and the Northern Lights. On our guided trips, professionals will give you tips for nature photography and show the best angles. Find out more about Levi with various guided trips that will take you by foot, on bike or in a canoe to the most beautiful places that Lapland has to offer.

### DOUBLE AURORAS - ONCE IN A LIFETIME EXPERIENCE

Did you know, in Lapland, you can see the Northern Lights as early as late August? Visit Levi offers a wide selection of excursions, for you to catch this magnificent natural phenomenon. How about a cruise on a pontoon ferry around you. If you wish to taste Lappish Food, enjoy nature's silence and an impressive view over the lake, then take part in an excursion to a private lake with dinner served in a traditional hut by the shore. With a bit of luck even Northern Lights will dance in the sky. The adventurer can go on a canoe trip in the late evening to go search for the lights or go on a horseback ride and see the Arctic nature and Northern Lights from yet another perspective.

### HARVEST TIME AND ARCTIC SUPER FOODS

When the summer days get shorter and autumn is on its way, it is time for harvesting. This is the best time to explore more remote areas of Levi and the superfoods there! You can pick cloudberries and many other delicacies straight into your mouth. Take part in a guided trip and see for yourself! Go and explore the Pallas-Yllästunturi National Park with a knowledgeable guide, learn how to cook your meal from ingredients found in nature, or go on a guided hike in Levi to find out more about the Lappish nature.

### SPEND SOME TIME WITH ANIMALS

During the autumn times nature shows its most beautiful side with its brilliant colours. Seeing the Lappish scenery from horse back during a ride is most of the most calming experiences you can have in nature. Experience the charming fourth gait tölt of Icelandic horses and listen to the silence around you. Whether you go during the daytime to admire fell scenery around you or in the evenings to search for the Northern Lights, a horseback ride is always exciting.

A visit to a husky farm is something not to miss during visit to Levi! During the autumn times the dogs are still on their holiday, enjoying the down time before the winter season. The guided visit gives a lot of information of the day-to-

day life on a husky farm, of the history of sled dogs and the history and practices involving mushing – the driving of a sled dog team.

During a visit at the Elves Village in Köngäs remember to say hello to the many animals. Some of the inhabitants of the Village are reindeer, sheep, chicken and horses. During a guided Walk with the Elf in the Yellow Dress you will hear many interesting things of the different inhabitants of the nearby forests, river and barns.

### THINGS TO DO FOR THE WHOLE FAMILY

During the crisp autumn days, the Levi village is full of things to experience and explore. A ride up the Levi fell with either the Express Gondola lift or the Gondola2000 lift to the top of the fell gives you an amazing view on a clear day over the whole Centre of Levi and the surrounding fells and lakes. Go hike around the fell on the marked trails or all the way down, go down with a Summer Sled or take the stairs from the Hotel Panorama. Keep your eyes open and search for the famous Santa's Cabin from the Christmas Story Movie. By the foot of the fell by the Gondola2000 station is the Activity Park area with its many possibilities to spend the day for both young and old. The Children's Traffic Park, Miniature Golf Course, Disc Golf course and of course the Adventure Park with its many Adventure Courses will make sure there's not a dull moment. The more adventur-

ous ones can borrow a village bike or rent a fat bike and go explore by themselves or go on a guided tour around the beautiful scenery of Levi. After an eventful day spent outside there's nothing more relaxing than going to the sauna or spend an afternoon at the Levi Spa in a jacuzzi or in one of the sauna's comfortable warmth.

Learn about the forest, its inhabitants and edible plants on a guided tour for the whole family or spend a day on the water paddling or fishing. Levi has a lot to offer, come and let Levi Spark Your Soul!

## SÄRESTÖNIEMI MUSEUM

The Särestöniemi Museum in Kaukonen, Kittilä, displays the art and working environment of Reidar Särestöniemi (1925-1981), who was the best known Finnish artist and the most remarkable Lappish artist of his time.

### THE WORLD OF ARTIST REIDAR SÄRESTÖNIEMI

Särestöniemi Museum by the river Ounas is a unique combination of art, architecture, nature and history. It tells the story of how a farmer's boy, Reidar Särestöniemi became an internationally successful painter, described as the Lapland's answer to Picasso. Särestöniemi got his inspiration from the surrounding nature. The spring flowers bloom in his paintings, the midnight sun is glowing red, the frosted birches stand in the glimmering light of a winter's day. The willow grouse represents the vulnerable side of the artist, whereas the embracing bears and seals symbolise love.

The Museum environment consists of several buildings. The family farm from the 19th century represents the traditional way of building in the North of Finland, whereas the wooden gallery and the studio, both designed in the 1970's by the acclaimed Finnish architects Reima and Raili Pietilä, join the tradition of modern Finnish architecture and its ideal of harmony with the surrounding environment.

The Museum is protected, defined as cultural-ly and historically important built heritage. The Museum office building includes a café and a museum shop.
